

Samir Mazen Sandouqa

Front End Developer

PROFESSIONAL SUMMARY As a forward-thinking Computer Science professional nearing graduation from Al-Balqa Applied University, I specialize in front-end development with a proven track record of building over five responsive web interfaces using HTML5, CSS3, JavaScript (ES6+), and React. During my internship at Safwa Islamic Bank, I bridge the gap between design and functionality by delivering UI/UX enhancements through Figma-based prototyping, which directly contributed to streamlined workflows and supported ATM system operations. My technical versatility is further anchored by foundational knowledge in .NET, ASP.NET, and SQL, alongside familiarity with Angular and the full Software Development Lifecycle (SDLC). By actively participating in coding competitions and completing diverse academic and real-world projects, I have cultivated sharp analytical thinking and debugging skills, ensuring the delivery of high-quality, scalable software solutions in collaborative environments.

TECHNICAL SKILLS

Web Development: HTML, CSS, Tailwind CSS, React JS, Material UI, GSAP

Programming Languages: JavaScript, Problem Solving

Version Control: Git, GitHub, Version Control

UI/UX Design: UI/UX Design, Figma, Responsive Design

API Development: API Integration

PROFESSIONAL EXPERIENCE

inter

Safwa Islamic Bank - Amman, Jordan

Jul 2025 - Nov 2025 (Internship)

- Collaborated on UI/UX improvements for the bank's application over a 5-month internship, contributing to feature enhancements including ATM check deposit functionality. Completed hands-on training with ATM systems, supporting daily operations, troubleshooting customer issues, and ensuring reliable performance. Assisted in coordinating multiple active projects by communicating with external programming vendors, tracking implementation steps, and helping maintain workflow continuity.

PROJECTS

Arabic Coders

- Developed a platform to facilitate problem-solving in Arabic, targeting Arab students with sections like competitions and community. Led the front-end development.

Skills

Technical Skills

- HTML
- CSS
- Tailwind CSS
- JavaScript
- React JS
- Material UI
- GSAP
- Git
- GitHub
- UI/UX Design

Soft Skills

- Problem Solving
- Teamwork
- Communication
- Adaptability

Technologies: HTML, CSS, JavaScript, React

- Time Management
- Attention to Detail

To Do List Application

- I developed a responsive task management app using React and JavaScript, focusing on efficient state management and data persistence via Local Storage. By prototyping the UI in Figma before coding, I reduced development time by 20% and ensured a seamless experience across all devices. The final application achieved a 95+ Lighthouse performance score, demonstrating my ability to build fast, user-centered web interfaces.

Technologies: REACT , Material UI

Cocktail coffee

- I developed an interactive landing page for a coffee house using React and GSAP to create smooth, scroll-based animations. By optimizing image assets and fine-tuning GSAP timelines, I reduced initial page load time by 1.5 seconds, ensuring a fluid user experience. The project focused on converting a Figma design into a fully responsive interface, achieving consistent performance across 4+ major browsers.

Technologies: HTML, CSS, REACT, GSAP
