PROFESSIONAL SUMMARY

Front-End Web Developer specialized in React and Next.js with strong expertise in JavaScript and TypeScript. Experienced in building scalable, high-performance web applications, reusable components, and modern responsive interfaces. Focused on clean architecture, performance optimization, and best development practices.

PROFESSIONAL EXPERIENCE

Front-End Web Developer
Kensoftware - Amman, Jordan

Jan 2026 - Jan 2026

- Built and maintained responsive web applications using React.js, Next.js, and Tailwind. Collaborated in designing large-scale projects, emphasizing clean folder architecture for better project maintainability. Enhanced user experience through modern animation techniques with GSAP and Framer motion.

Front-End Web Developer
Virtual Data It - Amman, Jordan

Jan 2026 - Jan 2026

- Contributed to multiple projects and ongoing frontend development for e-learning and project management platforms. Implemented reusable UI components, responsive layouts, and refactored legacy code to improve maintainability and performance. Developed and maintained scalable, high-performance frontend applications using React.js and Next.js.

PROJECTS

SyncHand – Projects and Tasks Management Tool

- Built a modular and user-friendly interface with Next.js, Tailwind CSS, and React Hook Form for smooth task and project operations. Integrated AI capabilities via the Gemini API to enable smart chatbot navigation within the platform.

Technologies: Next.js, Tailwind CSS, React Hook Form, Socket.IO, MongoDB, Gemini AI API, Clerk Auth, PWA, EmailJS, Postman, Draw.io
